### **DETAILED ACTION**

1. Applicant's preliminary amendment filed on December 08, 2005 to cancel claims 1-66 and add new claims 83-117 has been entered and made of record. Currently, claims 67-117 are pending.

#### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 83-117, drawn to an image scanner, classified in class 382, subclass 312.
  - II. Claims 67-82, drawn to a subject matter of generating three-dimensional data relating to an object, classified in class 702 subclass 152 and/or class 382 subclass 154.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because, at least, the limitation of "generate three dimensional data relating to the object" recited in subcombination of Invention Group II is not required in the combination of Invention Group I. The subcombination (Invention Group II) has separate utility such as generate three dimensional data relating to the object.

Art Unit: 2624

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
